INNOVATION QUALITY VALUE

YOUR AGRICULTURE INSPECTION & DATA COLLECTION SOLUTION

At Birds Eye Aerial Drones (BEAD), we bring together innovation, quality, and value to provide comprehensive drone solutions that revolutionize agricultural practices. From crop monitoring to livestock management, our aerial intelligence empowers farmers to make smarter decisions, optimize resources, and achieve sustainable growth.

Actionable Aerial Intelligence for a Smarter, More Sustainable Agriculture

- **Plant Health Monitoring:** Utilize multispectral and thermal imaging to detect early signs of disease, nutrient deficiencies, and pest infestations, enabling precise and timely interventions.
- **Precision Mapping:** Generate high-resolution orthomosaic maps and 3D terrain models for effective land management, optimized planting, and targeted irrigation.
- **Targeted Spraying:** Employ smart spraying systems for precise application of fertilizers, pesticides, and herbicides, reducing chemical use and environmental impact.
- **Livestock Management:** Offer innovative drone solutions for cattle counting, monitoring, and tracking to save time and reduce labor costs.
- **Accurate data forecasting and analysis**
- **100% Employees | Customizable Contract Structure**

FIRST IN INNOVATION

BEAD leverages cutting-edge drone technology to deliver actionable insights for modern agriculture. Our drones are equipped with multispectral and thermal sensors, providing precise data on plant health, soil conditions, and crop stress. Whether it's detecting early signs of disease or assessing nutrient deficiencies, our innovative approach enables proactive management that maximizes yields and minimizes waste.

FIRST IN QUALITY

At BEAD, quality is not just a standard but a commitment. Our highly trained team of certified pilots and data analysts works collaboratively to ensure accurate, reliable data every time. From field mapping to cattle counting, we deliver tailored solutions that meet the unique needs of each agricultural client. Our quality management system (QMS) ensures consistent, top-tier deliverables that exceed expectations.

BEST IN VALUE

We understand that every farm is unique, and so are its challenges. BEAD provides cost-effective solutions that drive real value, reducing labor and input costs through efficient drone operations. With our targeted spraying services, we minimize chemical usage and environmental impact, lowering costs, promoting healthier crops and sustainable farming practices. Our drones also offer livestock monitoring services, including aerial cattle counting and tracking, saving time and reducing operational expenses.

PAST PERFORMANCE SAMPLING

- Agricultural clients, including crop monitoring and counting projects.
- Proven results in enhancing yield, reducing costs, and promoting sustainable farming practices.

"BEAD's professionalism and precision have made them a trusted partner for our critical projects. Highly recommended for any future endeavors"

- Water Asset Management Client
